PROFESSIONAL EXPERIENCE

Intern Game Developer

Simplicity Games | 11.2025 - 04.2026

- Contributing to gameplay programming in C# within Unity
- Implementing new game features and systems under supervision
- Participating in QA processes and testing mechanics
- Collaborating with designers and programmers in an Agile environment
- Using GitHub and task-tracking tools to manage production workflow

Real Time Analyst

Netflix, Teleperformance | 05.2021 - Present

- Monitoring real-time performance for a team of ~80 agents, overseeing breaks, schedule adherence, and workflow
- Identifying and reporting issues in web application functionality; escalating technical problems when needed
- Preparing Excel-based reports and maintaining operational logs

ACTIVITIES

- University Game Development Projects - active participation in multiple semester-long projects and prototype labs
- Team-Based Production - collaboration with programmers, artists, and designers to deliver playable game builds during academic sprints
- Playtesting & Iteration - conducting internal tests, gathering feedback, and improving features based on test results
